

Cycle of Freshness

COMPANY PROFILE

Located in Rungis, France, UNIVEG Katopé Agrisol was founded in 1975 and became a member of the UNIVEG Group in 2008. The Managing Director is Nicolas Morinière.

UNIVEG Katopé Agrisol is specialized in the importation and the marketing of bananas in France and also distributes this fresh produce to other European countries.

With more than 30 years of experience, the company has privileged connections with reliable suppliers and offers a large choice of bananas originating from different countries: Suriname, Martinique, Costa Rica, Ecuador, Peru, and the Dominican Republic. The produce portfolio ranges from conventional to bio and fairtrade bananas.

Being part of the UNIVEG Group, a major player on the European market, allows UNIVEG Katopé Agrisol to build a close network with the large retailers in Europe.

UNIVEG Katopé Agrisol is well placed in the market to trade and to ripen bananas.

To provide a full service and to meet the growing demands of the retailers, wholesalers and foodservice partners in France, UNIVEG built new premises in Rungis, consisting of offices, a fully temperature controlled warehouse and a ripening centre to handle 35 000 tons per year. This new location will boost the expansion in order to provide year around delivery of bananas to its customer base in France and all across Europe.
