

Cycle of Freshness

COMPANY PROFILE

UNIVEG took over various import companies in Belgium in the early 90s. These activities have been consolidated in the company Uni-Veg Import. The company now imports fruit and vegetables for distribution in Belgium.

Uni-Veg Import has two locations:

- The European Import Centre in Brussels, focusing on European products;
- The Katelijne Distribution Centre (KDC) in Sint-Katelijne-Waver, focusing on overseas products and tropical fruit.

Both sites have their own cold storage facilities.

Together with its growers and retail customers, Uni-Veg Import plans production and packing to meet the specific needs of the customer. It is BRC certified and imposes strict conditions on suppliers to meet the quality standards of customers (GLOBALGAP, Integrated Crop management, etc.). It guarantees quick and efficient supply to the distribution centres.

CORE BUSINESS

- Imports of fresh fruit and vegetables directly from all over Europe and all others continents in the world. The growers, packers, exporters of this fruit are mainly members of the UNIVEG group, with their own production in South America, South Africa or the USA, or they are long-standing partners of UNIVEG in Spain, Italy, Morocco, France and other European countries.
- The company handles citrus, apples, pears, stone fruit, grapes, berries, melons, vegetables and all tropical fruit, packed in traditional or tailor-made packaging; in consumer packs upon request or made ready-to-eat if desired.
- Uni-Veg Import is certified to import fruit produced under the conditions of the Fairtrade Labelling Organisations (FLO) and distribute these fruits with the Max Havelaar label.
