

COMPANY PROFILE

Logidis is located in Almería, one of the main production areas in Spain. It joined the UNIVEG group in 2000, at the same time as Grupo YES.

The most important activity of Logidis is national and international transport of fruit & vegetables. However, during the last years, also services like distribution of frozen products to retail chains and distribution and transport of manufacturing goods are being offered by Logidis.

Logidis currently has a warehouse of 13,000 sqm in Nijar to store EPS crates. Besides storage, it also distributes, washes and keeps inventory of EPS crates.

Since 2006 Logidis fully manages a fleet of more than 160 trucks, using modern devices, such as temperature control units. This in order to provide the most efficient

and effective services to its customers. In 2009, Logidis transported a total of 8,500 full loads.

Logidis is offering transport services to all the companies belonging to the UNIVEG group as well as to companies dealing with fruit & vegetables and frozen food.

CORE BUSINESS

- Warehouse management: inventory, storage and handling services.
- National and international transport and distribution of fruit & vegetables, frozen and manufacturing goods.
- Consolidation services including picking of loads, storage and local reorganisation in order to optimize transport routes from Spain to Europe.
